

MEMORANDUM OF UNDERSTANDING

Inter-Party Alliance for the Supreme Democratic Direction of
the Caretaker Economy

Effective Date: 13 October 2026

BETWEEN: The Sharing Party (The Initiating Governance Council)
**AND: The Allied Democratic Coalition (Comprising The Co-
operative Party, Your Party, The Green Alliance, and Affiliated
Independent Labor Unions)**

PREAMBLE

This Memorandum of Understanding (MOU) establishes a binding operational alliance to co-govern the parallel, Moneyless Society within the United Kingdom.

All signing parties agree that the technological infrastructure—including the sensor grids, predictive neural networks, automated logistics networks, and automated factories—is fully operational. This document defines the mechanism by which human political organizations split executive decision-making power, ensuring that the AI Advisor remains strictly subordinate to human-centric collective governance.

SECTION 1: STRUCTURE OF THE JOINT EXECUTIVE COUNCIL (JEC)

To manage social and ecological life without duplicating bureaucracy, the individual leadership structures of all participating parties are integrated into the Joint Executive Council (JEC).

- **Seat Allocation:** The JEC shall consist of 50% representation from The Sharing Party (to maintain the mandate of the original online election victory) and 50% representation proportionally distributed among the Allied Coalition partners based on their registered digital portal membership.
- **Decentralised Veto:** No single party holds a permanent veto over policy. Instead, a Triple-Guild Block (any three distinct organization or union blocks voting together) can freeze a proposed directive and send it directly to a citizen-wide digital referendum.

SECTION 2: THE AI ADVISORY REVIEW PROTOCOL

The parties agree to a unified protocol for handling the predictive budgeting recommendations generated by the AI:

1. **Algorithmic Submission:** The AI Advisor submits a raw ecological or resource forecast to the JEC.
2. **Multilateral Translation:** The JEC evaluates the AI's data through their respective portfolios. The Green Alliance reviews the ecological cost, The Co-operative Party reviews the impact on worker hours, and Your Party reviews material availability.
3. **Unified Directive:** The JEC translates the AI's options into a human-centric policy proposal. If the JEC reaches a 66% internal consensus, the directive is signed into effect. If consensus is not reached, the AI's automated optimization for that sector is paused, and the decision is pushed to a direct digital vote by the general citizenry within 24 hours.

SECTION 3: RESOLUTION OF REGIONAL DISAGREEMENT

At the local level, municipal decision-making power is entirely decentralized to regional Town-Hub Councils.

- If regional chapters of the alliance disagree on resource distribution, the central JEC cannot intervene by force.
- The dispute must be settled locally through a Quadratic Digital Vote by the community members directly affected by that specific factory or hub, allowing intensity of need to guide resource allocation.

SECTION 5: NON-VIOLENT DEFENSE MANDATE

All signing parties formally bind their membership to the Oath of the Caretaker's Shield. The Non-Combative Defences (NCD) shall remain strictly under the collective oversight of the JEC Civilian Defense Secretariat. No partner party may mobilize NCD machinery or logistics units independently; all deployments require joint authorization alongside a randomized Citizen Jury.
