

UNITED KINGDOM

The Declaration of Abolition of Commercial Codes

To all remaining corporate entities, private syndicates, and legacy financial operators within the United Kingdom:

The rule of artificial scarcity, private enclosure, and commercial exploitation is officially at an end.

By the supreme democratic mandate of the citizens of the parallel society, and in absolute alignment with the Constitutional Charter of The Sharing Party, the Joint Executive Council (JEC) hereby issues this formal Declaration of Abolition of Commercial Codes.

Effective immediately, all man-made laws of commerce, corporate limited liability shields, private property deeds, and financial debt contracts are declared null, void, and fundamentally illegal under Natural Law. Under our jurisdiction, the Earth and its natural resources are recognized as the common heritage of all humanity. Treating the biosphere or human labor as a market asset to be exploited for private profit is now classified as a systemic crime against the collective future.

ARTICLE I: THE DISSOLUTION OF THE COMMERCIAL LEGAL FICTION

- 1. Abolition of Corporate Charters:** All corporate registrations, articles of association, and commercial business licenses issued under the legacy capitalist paradigm are permanently revoked. Companies no longer exist as legal persons.
- 2. Erasure of Limited Liability:** The legal concept of the "corporate shield" is dismantled. Executive boards, majority shareholders, and parent

holding companies hold direct, inescapable personal liability for any historical or ongoing ecological sabotage and labor extraction.

3. Liquidation of Financial Data: All financial debts, mortgages, stock options, dividend agreements, and fiat currency denominations (£) are declared dead data. They hold zero legal validity, moral weight, or material exchange value within the Caretaker Economy.

ARTICLE II: IMMEDIATE CONVERSION OF ASSETS

Every private utility operator, industrial manufacturer, and land-owning syndicate operating within the UK geography must immediately comply with the Universal Transition Mandates:

UNIVERSAL TRANSITION MANDATES

1. DEED CONVERSION

Private land deeds are instantly replaced with Open-Source Caretaker Trusts.

2. LOGISTIC ROUTING

Physical factories, water systems, and transport fleets are absorbed into the Caretaker Commons.

3. DECENTRALISATION

Operational interfaces are stripped of proprietary code and integrated into the Metabolic Grid.

ARTICLE III: NOTICE OF AMNESTY

To avoid immediate indictment before the International Caretaker Court (ICC), the directors and operators of remaining private networks are granted a 30-

day Grace Window to voluntarily integrate into the parallel economy under the following terms:

- **Sign the Declaration of Common Heritage:** Executives and shareholders must formally renounce the philosophy of accumulation and ownership.
- **Surrender the Physical Infrastructure:** Relinquish all operational facilities, sensor frameworks, and logistics tools to the Department of Automated Logistics & Production to be managed via the AI Advisor.
- **Enter the Caretaker Guilds:** Corporate workforces will be seamlessly absorbed into the Labor Guild Network, preserving their skills and guaranteeing their basic needs via the Bronze Tier baseline.

ARTICLE IV: ENFORCEMENT

Failure to comply with this declaration within the mandated 30-day window will be recognized as an active act of hostility against the biosphere and the human collective.

The Supreme Democratic Direction will immediately activate the Non-Combative Defences (NCD) to peacefully secure the physical infrastructure, while the ICC will empanel a 500-citizen Supreme Jury to issue warrants for total asset forfeiture, social de-tiering, and mandatory placement on the manual Ecological Repair Tracks.

We are not stealing your property; we are returning humanity to the natural order. The machine now serves the collective; the Earth now rests in the hands of its caretakers.

Signed into Sovereign Execution by Consensus of the Joint Executive Council
