

International Caretaker Court

REF: ICC-2026-1012 / UK-Thames-Node

Classification: Public Record – Open Access via Public Ledger

I. Case Overview & Defendants

The Prosecution: The Bureau of Democratic Jurisprudence, on behalf of the Residents and Local Councils of the Greater London and Thames Valley Technates.

The Defendants: Executive Board, Major Institutional Shareholders, and Parent Holding Companies of Thames Water Plc.

Core Indictment:

- **Category I:** Ecocide & Biosphere Sabotage (Systemic Riverine Pollution)
- **Category II:** Infrastructure Starvation and Public Hazard Creation

II. Formal Charges & Sensor Grid Telemetry

Charge 1: Ecocide via Systemic Sewage Discharges

The defendants systematically utilized the River Thames and River Lea as dumping grounds for untreated effluent to preserve corporate cash flow during the final years of the capitalist paradigm.

[AI ADVISOR ASSESSMENT]

Telemetry pulled from Hackney marshes and Teddington lock nodes confirms 680% elevation in coliform bacteria and industrial nitrates. Predictive neural networks estimate a 42% decline in native fish populations. Restoration requires 5.8-megatonne carbon-equivalent ecological engineering.

Charge 2: Infrastructure Starvation and Resource Neglect

Intentional structural decay of clean water distribution networks, resulting in massive leakage while enforcing artificial restrictions on citizens.

III. Physical & Structural Asset Forfeiture Inventory

Asset Category	Physical Inventory Breakdown	Immediate Parallel Rerouting
Water Treatment Infrastructure	102x Waste Treatment Plants (Beckton/Crossness), 30x Reservoirs.	Handed to Department of the Caretaker Commons [Hackney Node] as public utility trusts.
Logistics & Machinery	1,400x Maintenance Vehicles, heavy excavation machinery, pipe-laying fleets.	Absorbed by NCD for conversion to zero-emission emergency engineering specs.
Real Estate & Land Holdings	Thousands of acres of operational land, facilities, and corporate offices.	Converted to Community Land Trusts for rewilding and guild housing.

IV. Proposed Restitution Framework

- **Abolition of Corporate Entity:** Thames Water Plc is permanently dissolved. Administrative silos integrated into the open-source Metabolic Grid.
- **Executive Custodial Sentence:** Board members stripped of Silver/Gold tiers; Social Reliability (SR) scores set to 0.
- **Ecological Repair Track:** 48-month mandatory manual labor track (clearing blockages, planting reed beds) to earn Liquid Points.
